RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 146 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: . . . the yearly period is exactly a year. Meanwhile, later on, a correction of-j-4 days for the length of the period is assumed beside such a one of 8 days for the mean epoch and, as Chandler thinks it proved that the length of the period is variable, he accounts for the correction by a quadratic term added to the formula of the epochs which thus becomes: $T = 2412640 - f \cdot l27i \cdot 0 - -Od. 08 JE3 (3)$ where the initial epoch is placed 24 periods later than that of the preceding formula. Tested by the older observations this formula proved to satisfy fairly those since 1835, but not at all those of Pond, which leave for the epoch a deviation of 166 days. Although formerly Chandler set great store by Ponds observations, it yet seems that he desires to have the elements of formula (3) regarded as, , the revised elements he wished to determine. It is true that a doubt about this conclusion arises by reading in the conclusions which, in another part of the paper (p. 107), are derived from substantially all the competent testimony available (b), , that the mean period since 1825 is 428 days within a small fraction of a day, whilst formula (3) gives us for this quantity 431A6, and (d) that the hypothesis of a change in the period uniform with the time is incompatible with the observations before 1860, whilst in conclusion (e) a change per saltum between 1830 and 1860 is...
