The useful model invigorates the creative power. The sense of observation is strengthened by learning to judge about different substances, structure and properties of wood, the quality of tools, etc. And especially by the geometrical method set forth in this book the elements of geometry are acquired without any extra effort or straining. This geometrical system creates a taste for simple, beautiful, and rational forms, and the geometrical constructions develop the pupil s reasoning power. 2. Manual - The hand is trained to be a ready servant and medium for the brain. General dexterity is promoted and the pupils become more practical. 3. Psychological. - The Pedagogical Sloyd builds a road between the brain and the fingers, and produces presence of mind and readiness to face emergencies. Sloyd thus helps to develop an energetic, courageous and self-relying character. The children are gradually trained towards a feeling of self-help and independence; they learn to acquire something by their own work without the aid of the almighty penny, and are in that way led to find themselves useful members of the community.
