

Bulletin - Engineering Experiment Station Volume 75-80

By University Of Illinois Station

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 edition. Excerpt: .to it subsequent to taking the weight and the temperature of the latter, the result is essentially the same as though the closed system had been used, and no account need be taken of the water thus circulated. In the present case, however, the temperature was taken close to the boiler and after the circulating water had gone into the feed water. The water-back has, therefore, been considered as part of the heating surface of the boiler and the heat absorbed by the circulating water has been reduced to terms of equivalent water evaporated and added to the boiler output as discussed under feed water corrections in the Appendix. 10. Flue Gas.--Flue gas samples were collected over half-hour periods. One sample was taken at the breeching about 2 ft. below the dampers and a second one at a point about 8 in. behind and...
