Brand New Book ***** Print on Demand *****.Excerpt from The Rudiments of Relativity: Lectures Delivered Under the Auspices of the University College, Johannesburg, Scientific Society The following pages contain four lectures which were prepared as a Presidential address to the Scientific Society of this College. Although their preparation entailed a considerable amount of labour I regarded it as a normal incident of academic life, and had no intention of publishing my views. Many of my colleagues, hearing of the topic proposed for discussion, expressed a desire to be present, and the Council of the Scientific Society accordingly decided to throw the lectures open to the public. The response to that invitation was astonishing and stimulating; it showed that even in what is regarded (quite unjustly, I think) as a very frivolous and material centre there is a widespread desire for intellectual stimulus. Various members of that audience have asked me to publish my lectures; I therefore print them now substantially as delivered, although I should have preferred a less crude and incomplete form of presentation. It will be borne in mind, I trust, that I was primarily addressing students whose scientific knowledge and reading could hardly be called extensive; it was therefore essential that I should divest the theory of its customary mathematical elegance, and present instead its physical basis and implications.
