Brand New Book ***** Print on Demand *****.Excerpt from The Health Bulletin, 1915, Vol. 30 All outdoors is ours for the taking - the health of sunshine and fresh air and that good feeling that comes extra. Usually what is food for flies is poison for man. Where they feed you should not feed. Where they swarm they find something to eat. If it is in the meat shop, the cafes or restaurants, the grocery stores or your own kitchen, you should not eat there. If for some reason you did not have your spring cleaning in March, get it done the first days of April. Don't stop with cleaning the house. Clean the yards, back and front, and see that there's no winter trash left, or places where flies or mosquitoes may breed during summer. Now is the time to fight the fly. Don't wait till next month or the next when he arrives with a host ten thousand strong, to try then to put him to death. Strike now while he is one. Clean up. Destroy his breeding place. Leave him nothing to live on. The fight now against individuals is easy compared to the ten thousand new recruits next month. Many of the defects have been found to be bad eye sight, bad teeth, adenoids, enlarged tonsils or glands and those diseases that are easily remedied If discovered and treated in time. If you have that tired, good for nothing feeling, don't think that...
